HUTDIG®
BUILDING PRODUCTS
Constructive Solutions Since 1885

HGFASTCAT
06/2020

BUILT ON EXPERIENCE. FOCUSED ON THE FUTURE.

For more than 130 years, Huttig Building Products has been helping to build the American dream. Founded in 1885 by brothers Charles and William Huttig, Huttig understands the value of teamwork, commitment, and what it takes to be successful every day and for years to come.

Today, Huttig is the country's largest value-added distributor of millwork products such as interior and exterior doors, plus much more. With 27 distribution centers and access to 75%+ of the US housing market, what started out as a saw mill and lumberyard has evolved to become America's only national distributor of millwork and specialty building products.

This spirit of service and innovation led Huttig to create the Huttig-Grip brand of fasteners, and for more than 20 years, this respected line has been available on a regional basis. Now, Huttig unveils the re-imagined and expanded line of Huttig-Grip construction fasteners, collated fasteners, and building materials.

What makes Huttig-Grip products unique?

- Available nationwide through Huttig's broad distribution network
- Developed by a team of industry experts that knows the products, knows the business and knows what dealers need to sell more fasteners
- Sourcing network to ensure reliable, diverse supply of fasteners from the most reputable mills around the world, including North American suppliers for short lead times.
US product also available
- Packaging completely redesigned for painless execution and flawless presentation at point of sale

Make Huttig-Grip your choice and the best choice for your customers.

1885
Huttig founded by
brothers Charles and
William Huttig

1917
Huttig called to support
war effort, manufactures
aircraft

1934
Expansion of
branches across
the country

Huttig + Huttig-Grip is the right choice for your business. How?

- A growing mix of products brought to you by the people and the company that you know and trust
- With more than 30,000 Huttig-Grip SKUs and tens of millions of dollars invested in local inventories, your success is our success
- Increase turns and minimize stock-outs with our next-day delivery of inventoried shelf items
- Huttig-Grip plus many other leading brands across millwork and building material categories
- Warehouse and direct programs; Huttig provides experienced support across a variety of platforms to fit your changing business needs

With Huttig-Grip brand products from Huttig, you now have access to a diverse mix of products, ranging from specialty doors and millwork to building materials and construction fasteners. It's a value proposition that's unparalleled in the industry—and one that helps you get more of what you really need: sales!

YOU DESERVE A CHOICE. AND WITH HUTTIG-GRIP PRODUCTS, YOU GET IT.

1941
Huttig produces war materials for U.S. government

1967
New era of growth and expansion

2017
Huttig offers renewed and expanded Huttig-Grip products

2015
Huttig launches iconic "We Love Building" campaign

2003
Branches run by general managers who localize offering

1985
Huttig experiences \$700 million in growth over 15 years

1976
Huttig generates \$100 million in sales

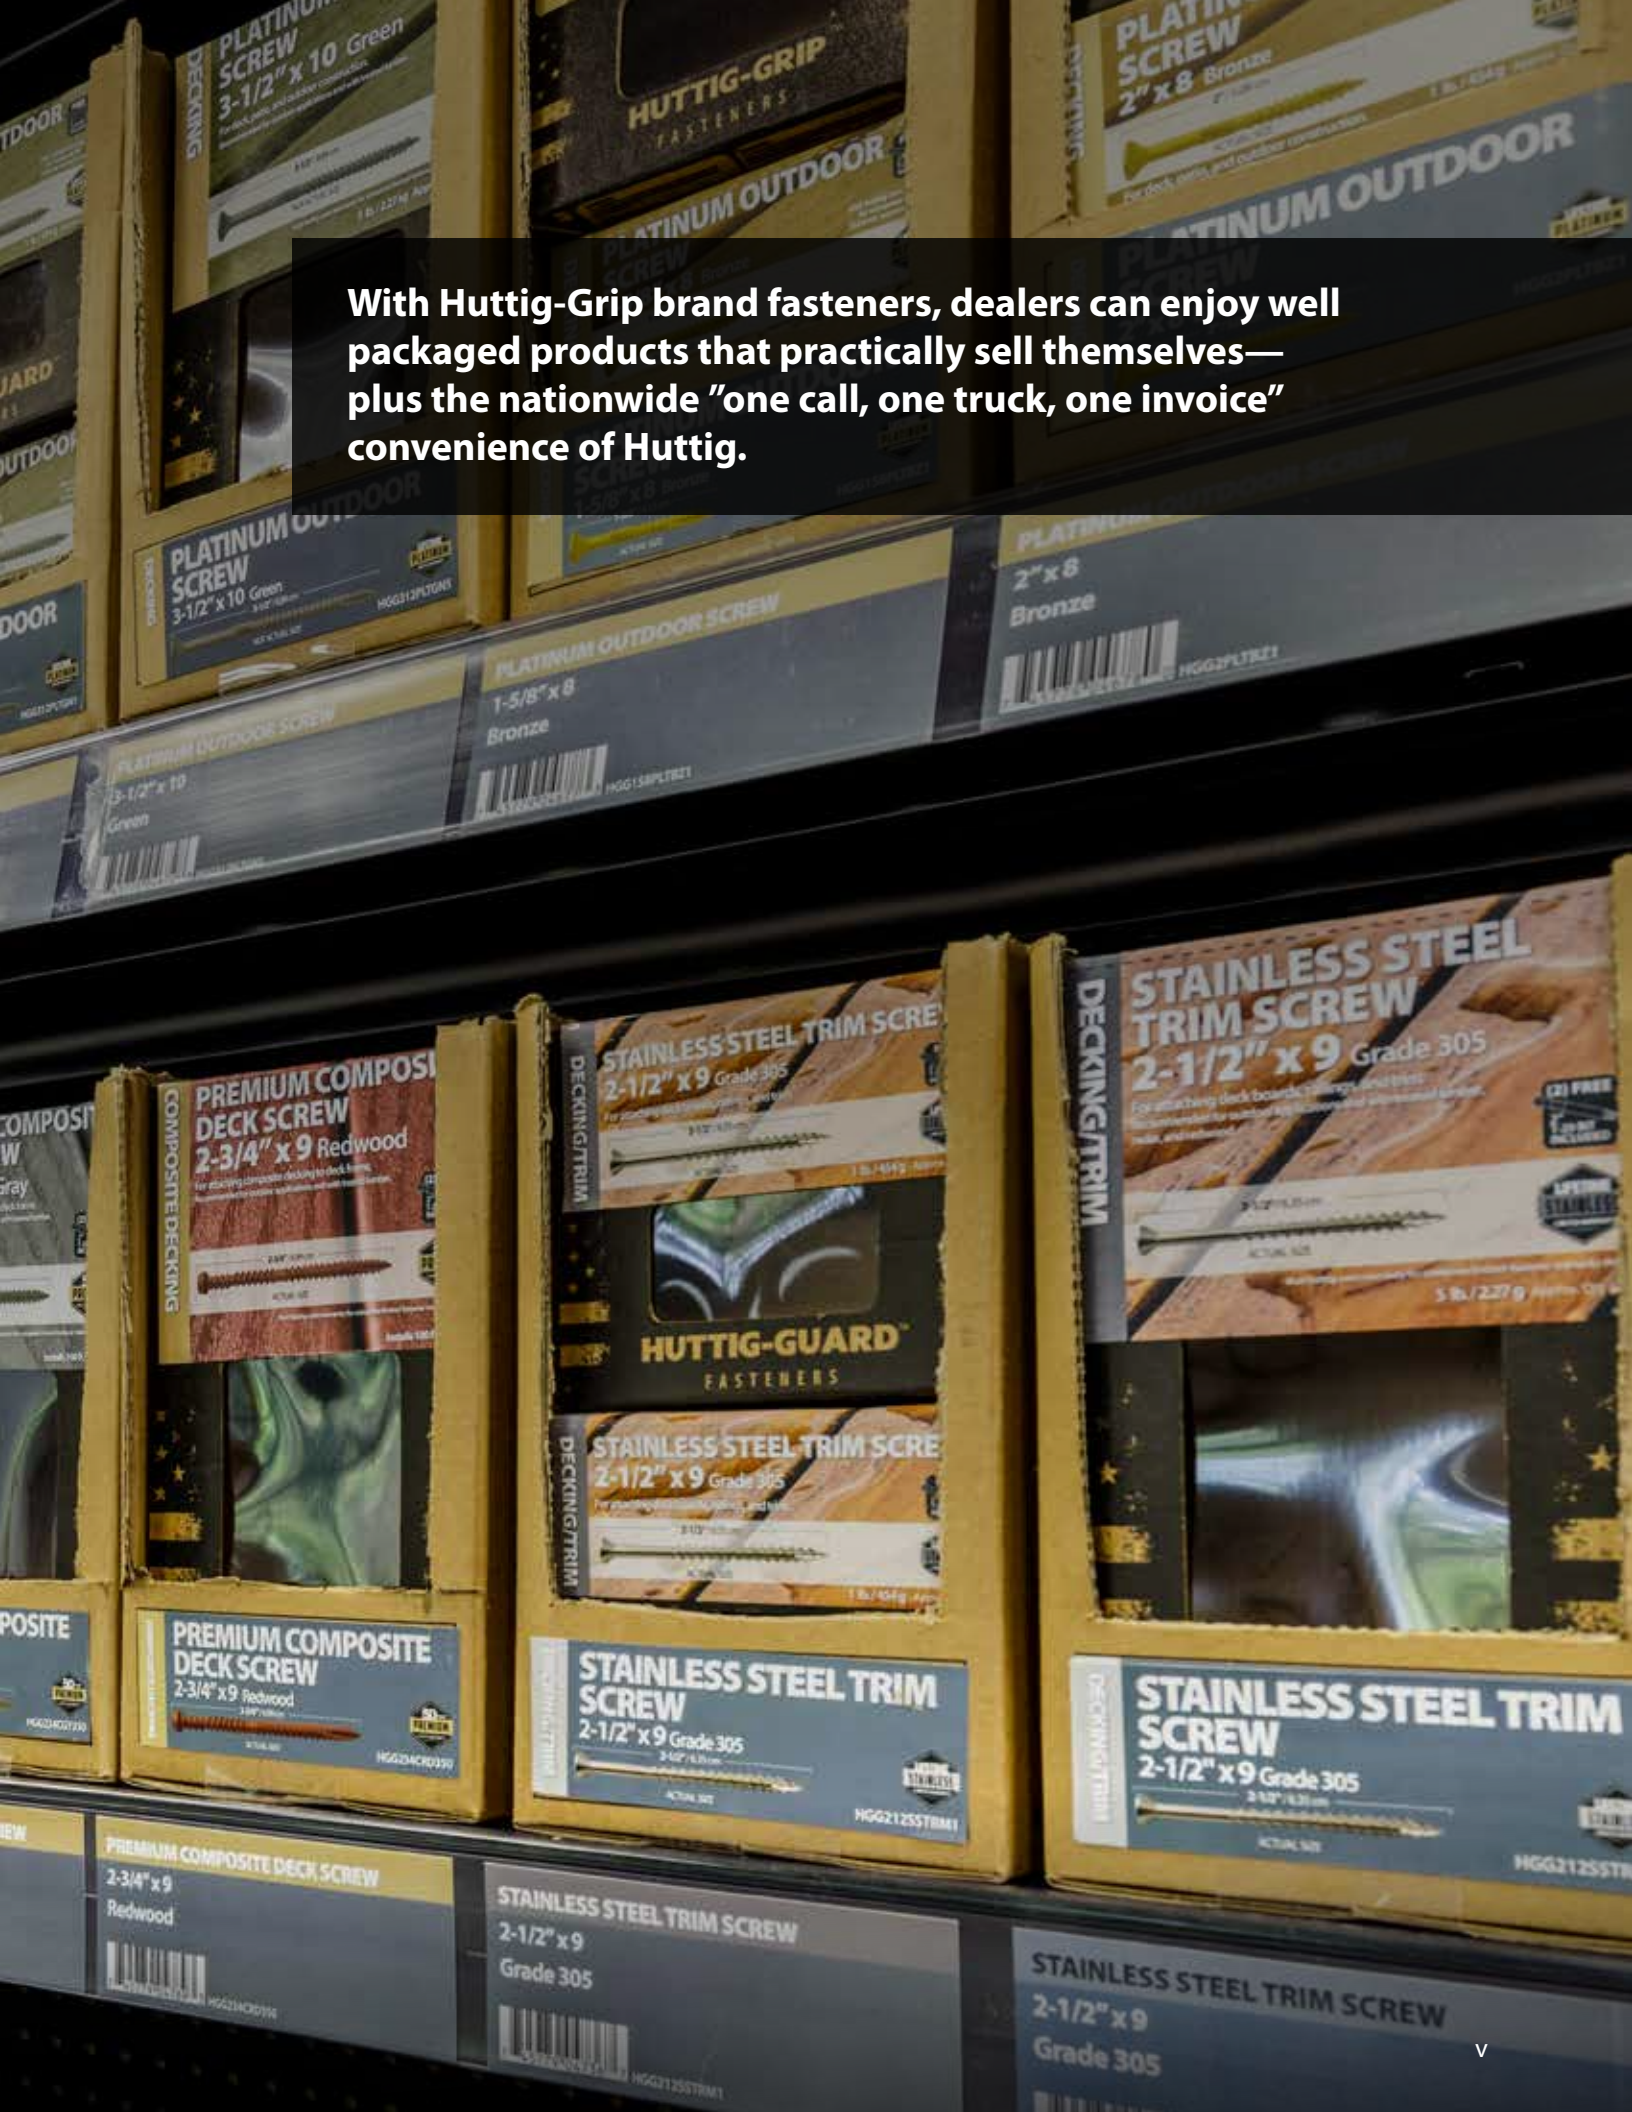

THINKING INSIDE AND OUTSIDE THE BOX

To develop a better fastener program, including improved packaging, we didn't just go back to the drawing board—more importantly, we went to dealers. And when they asked for a brand that helped them order, stock, display and sell what their customers needed, Huttig delivered with no-nonsense packaging that works as hard as the people who use it.

Consistent packaging and branding throughout is intentional and helps in multiple ways:

1. Branding: easy to identify in the store, supports brand preference
2. Merchandising: provides a cohesive appearance throughout the entire fastener section as packaging looks the same and the packaging physically is the same

With Huttig-Grip brand fasteners, dealers can enjoy well packaged products that practically sell themselves— plus the nationwide “one call, one truck, one invoice” convenience of Huttig.

WE MAKE IT LOOK EASY

With icons that are easy to see and text that's simple to understand, Huttig-Grip makes identifying the right product a snap. The faster a customer can find what they need, the happier they'll be with what you have to offer.

APPLICATION:

The four most common uses of fasteners—general, outdoor, roofing/siding and drywall—each associated with a color.

FINISH:

Recommended fastener finishes within each application category.

HUTTIG-GRIP FASTENERS

APPLICATION	AVAILABLE FINISHES									
General Construction	BRT BRIGHT	EG ELECTRO GALVANIZED			VC VINYL COATED					YZ YELLOW ZINC
Outdoor Construction		EG ELECTRO GALVANIZED	HG HOT GALVANIZED	OG OUTDOOR GALVANIZED						
Roofing & Siding	BRT BRIGHT	EG ELECTRO GALVANIZED	HG HOT GALVANIZED					AI ALUMINUM	CU COPPER	
Drywall	BRT BRIGHT				VC VINYL COATED	PC PHOSPHATE COATED	BL BLUED

WARRANTY				

HUTTIG-SPIN FASTENERS

COLOR CODE	APPLICATION	AVAILABLE FINISHES			
Drywall	For attaching drywall to wood	PC PHOSPHATE COATED			
Light Gauge	For attaching drywall and other materials to light-gauge steel	PC PHOSPHATE COATED	ZP ZINC PLATED		
Heavy Gauge	For attaching drywall and other materials to heavy-gauge steel	PC PHOSPHATE COATED	ZP ZINC PLATED		
Wood	For attaching to wood			BRT BRIGHT	YZ YELLOW ZINC
Fiber/Cement Board	For attaching cement and fiber cement board				

LABEL

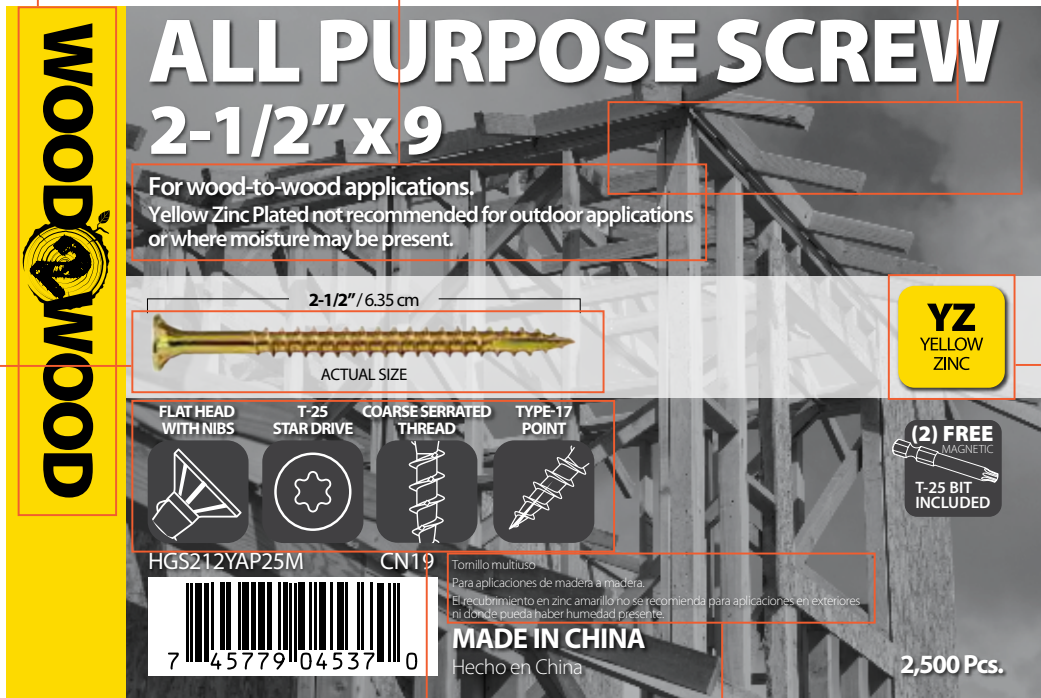

Most popular application in the color band.

For wood-to-wood applications.
Yellow Zinc Plated not recommended for outdoor applications or where moisture may be present.

Most popular application and appropriate use in text on the label.

Most popular application as a photo in the label background.

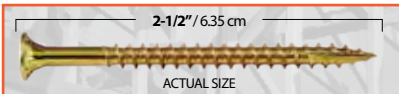

Color-coded band & finish icon—identifies what type of finish/where best used.

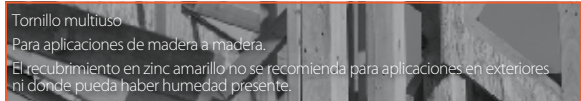

(2) FREE MAGNETIC T-25 BIT INCLUDED

Actual size photo eliminates boxes torn open so someone can see what the actual fastener looks like.

Key information provided in Spanish.

Icons clearly show product attributes.

THE DIFFERENCE IS IN THE DETAILS

There's nothing left to chance on Huttig-Grip product packaging. From box design to label layout, colors to imagery, everything is created to make products easy to stock and even easier to sell.

MASTER CARTONS

Master cartons feature the same width and height, making it easy for dealers to switch-up merchandising to maximize inventory turns, as well as simplifying inventory overstock.

1 & 5 LB. PACKAGES

The 1 lb. & 5 lb. boxes have the largest and thickest window on the market, reducing punctures and providing customers a clear look inside, reducing torn and opened packaging.

SAME WIDTH

1 lb. & 5 lb. boxes also have the same width, so dealers can maximize inventory turns by switching-up merchandising. Plus inventorying overstock is a snap.

WHY HUTTIG-GRIP?

Our packaging features a unique, retro-inspired look that stands out from the competition. It's an easy-to-spot style that's also a reminder that Hutdig-Grip products are built on a 130+ year history and created to work hard.

PACKAGED FOR PROS. PERFORMANCE TO COUNT ON.

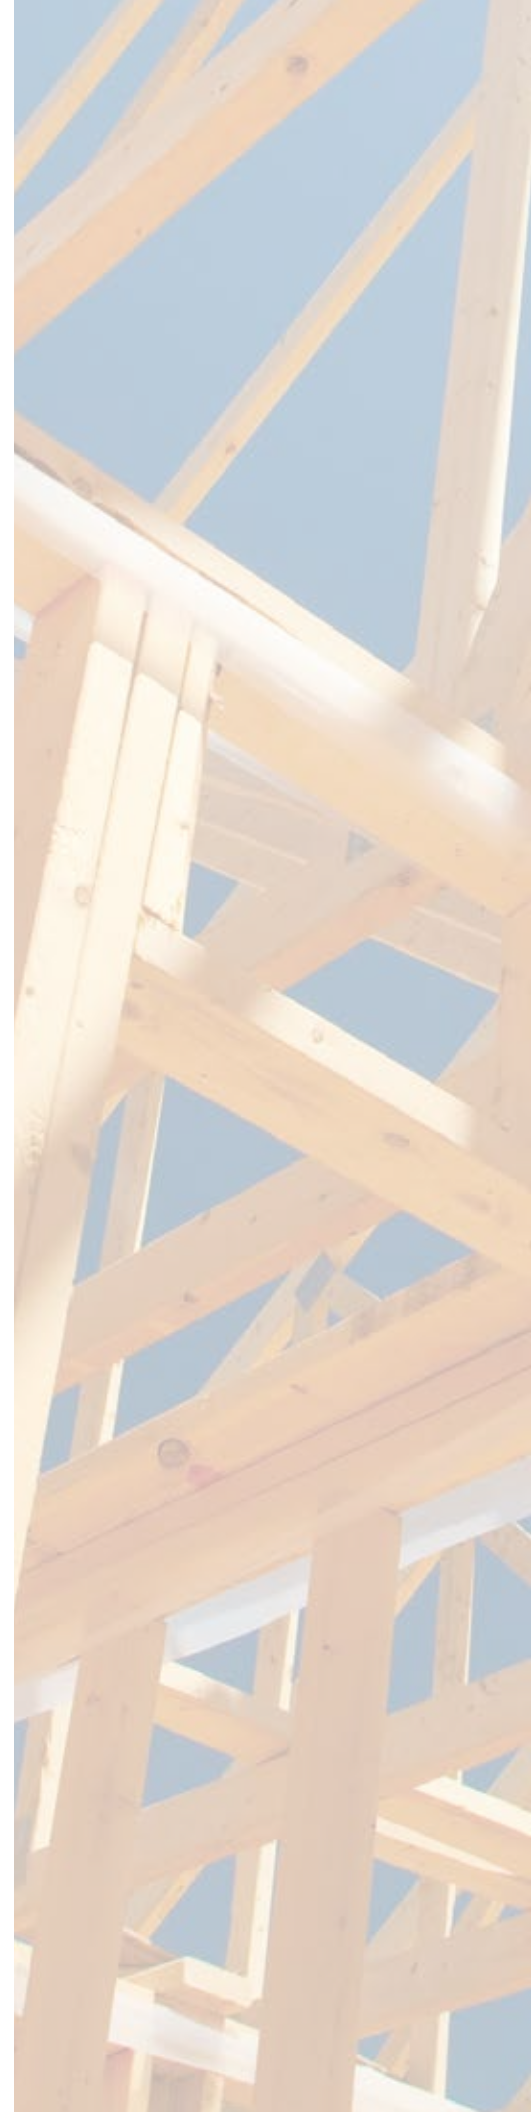

Large jobs call for big solutions, and that's exactly what Huttig-Grip products bring with bulk and collated fastener selections—featuring built-in handles, standard package widths, easy-to-understand labeling and more.

HAND DRIVE

Boxes have built-in handles to make them easier to carry.

Same footprint makes it easy to stock and easy to merchandise.

COLLATED

Huttig-Grip Collated Fasteners is the only brand of collated fasteners that you need, for every job and for every tool:

- Coil Roofing Nails
- Framing Nails-Stick & Coil
- Fencing/Siding Nails
- Joist Hanger Nails
- Medium & Wide Crown Staples
- Narrow Crown Staples, Finish & Brad Nails
- Flooring Staples & Cleat Nails

Many collated boxes feature convenient built-in handles for easier carrying, plus bold styling for stronger merchandising.

WHY HUTTIG-GRIP?

Products and materials are sourced from the highest quality suppliers across the globe, including North America and Made In USA (where available), ensuring that our supply can always meet your demand.

CONSTRUCTION FASTENERS

WOOD & EXTERIOR SCREWS

DRYWALL & STEEL FRAMING SCREWS

COLLATED FASTENERS

Application & Finishes

APPLICATION	AVAILABLE FINISHES									
General Construction	BRT BRIGHT	EG ELECTRO GALVANIZED				VC VINYL COATED				
Outdoor Construction		EG ELECTRO GALVANIZED	HG HOT GALVANIZED	OG OUTDOOR GALVANIZED						
Roofing & Siding	BRT BRIGHT	EG ELECTRO GALVANIZED	HG HOT GALVANIZED					AI ALUMINUM	Cu COPPER	
Drywall	BRT BRIGHT					VC VINYL COATED	PC PHOSPHATE COATED	BL BLUED		

FINISH RECOMMENDATIONS

BRT BRIGHT	BRT BRIGHT	BRT BRIGHT	Plain, "bright" steel without any additional protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.	
VC VINYL COATED	VC VINYL COATED		Nail dipped in vinyl; vinyl heats as nail is driven into wood for easier driving, provides nominal enhanced holding power when cools.	Vinyl coating does not provide protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.
PC PHOSPHATE COATED			Iron phosphate coating created on the surface of the fastener to enhance adhesion of paint and other finishes (drywall compound).	Phosphate coating provides minimal protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.
BL BLUED			Exposed to heat for "sterilization", which creates the blue appearance.	Most commonly used on lath or other relatively small nails, which at one time were often held in the mouth prior to nailing.	Not recommended for outdoor applications or where moisture may be present.
EG ELECTRO GALVANIZED	EG ELECTRO GALVANIZED	EG ELECTRO GALVANIZED	Zinc plating bonded to steel with electrical charges; smooth, shiny finish.	Electro galvanization provides moderate protection against corrosion.	Recommended for outdoor applications excluding treated lumber.
HG HOT GALVANIZED	HG HOT GALVANIZED		Hot zinc applied to fastener for thicker, more durable coating; rougher, sometimes darker finish.	Hot galvanization provides significant protection against corrosion.	Recommended for outdoor applications and with treated lumber.
OG OUTDOOR GALVANIZED			Multi-step process; zinc applied to fastener followed by a variety of methods to harden the coating for additional protection.	Outdoor galvanization provides significant protection against corrosion, equal to or better than hot galvanization.	Recommended for outdoor applications and with treated lumber.
AI ALUMINUM			Inherently resistant to corrosion, lighter than comparable steel nails.	Used with aluminum flashing, gutters, siding, and screening.	Not recommended for use with treated lumber or copper flashing due to corrosive reaction.
Cu COPPER			Copper is anti-corrosive by nature; known for durability and longevity. Develops attractive patina with age.	Commonly used with roofing tiles and slates, copper roofs and gutters; can also be used with treated lumber.	Not recommended for use with aluminum flashing or other aluminum materials due to corrosive reaction.

Make the right choice for outdoor projects, choose Huttig-Grip galvanized nails.

Huttig-Grip Hot Galvanized and Outdoor Galvanized Nails - Two Solutions to the Same Problems

- ✓ Extend the life of your outdoor project.
- ✓ Minimize staining and "bleeding" from rusting nails.
- ✓ Use Huttig-Grip galvanized nails for extra protection against rust and corrosion.

Steel nails can be compromised by moisture, chemicals in the wood (naturally occurring or treated), and other factors. Coatings and other finishes can be applied for additional protection against corrosion and rust.

HUTTIG-GRIP HOT GALVANIZED NAILS & OUTDOOR GALVANIZED NAILS

- Are recommended for outdoor applications and with treated lumber
- Meet or exceed ASTM A153 Class D requirements for galvanization
- Last longer than non-galvanized nails, extending the life of your project!

OUTDOOR GALVANIZED

- Recommended for outdoor applications and with treated lumber
- Meet or exceed ASTM A153 Class D requirements
- Smoother finish than HG
- Outperforms HG in ASTM B117-compliant salt spray testing (evaluates approximate lifespan)

HOT GALVANIZED

- Recommended for outdoor applications and with treated lumber
- Meet or exceed ASTM A153 Class D requirements
- Nails or the wire used to make nails may be tumbled or dipped in hot, molten zinc

Huttig-Grip galvanized nails availability varies by market preference; hot galvanized or outdoor galvanized might not be stocked in all areas. Visit huttig.com/warranty for complete limited fastener warranty details.

 OG OUTDOOR GALVANIZED		 HG HOT GALVANIZED	
OG Outdoor Galvanization is an alternative to HG Hot Galvanization with equal or better corrosion resistance.		HG Hot Galvanization is a traditional process to provide additional protection against corrosive environments and materials.	
ASTM Compliance & Testing			
OG coating thickness is equal to or better than ASTM A153D specifications.		HG coating thickness is equal to or better than ASTM A153D specifications.	
OG outperforms HG in a traditional salt spray test performed according to ASTM B117.		---	
Surface			
<ul style="list-style-type: none"> • Smooth, uniform coating for better protection • Reduces tool jamming (when applied to collated nails) 		<ul style="list-style-type: none"> • Coating may not always be evenly coated or distributed • Zinc may fill threads on ring or spiral shank nails • Increases the diameter/bulk of the nail 	
Process			
Primarily two methods to produce OG nails:		Primarily two methods to produce HG nails:	
1. Thermal Diffusion Galvanization	2. EG Electro Galvanized Zinc + Organic Top Coat	1. Formed from Galvanized Wire	2. Dipped in Molten Zinc After Nail Formation (Hot Dipped Galvanization)
<ul style="list-style-type: none"> • Nails placed in a cylinder with a dry zinc mixture (zinc/iron), heated, and slowly rotated for several hours (vaporized diffusion process) • Nails are then cleaned and passivated, and dried 	<ul style="list-style-type: none"> • Nails are first electro galvanized • Electro galvanized nails then painted with an organic coating and baked twice • Organic coating behaves as a barrier between the zinc on the nail and corrosive materials such as the chemicals in treated lumber 	<ul style="list-style-type: none"> • Carbon steel used to manufacture nails is passed through a tank of molten zinc • The galvanized wire is then used to form nails (most often used for collated nails) 	<ul style="list-style-type: none"> • Nails are formed from bright carbon steel wire • The formed nails are then dipped twice in molten zinc (more common for hand drive versus collated nails)
Coating is harder than that of other zinc coatings	—	Zinc coating is softer than zinc/iron OG coating	
Thermal Diffusion Galvanization <ul style="list-style-type: none"> • Minimal waste • Acid-free cleaning • Environmentally-friendly process 	—	Molten Zinc <ul style="list-style-type: none"> • Process creates significant waste streams • Acid-pickling (used to prepare the nails after galvanization) is harmful to environment 	

CONSTRUCTION FASTENERS

WOOD & EXTERIOR SCREWS

DRYWALL & STEEL FRAMING SCREWS

COLLATED FASTENERS

HUTTIG-GUARD STAINLESS STEEL NAILS

For the ultimate protection against corrosion, choose HUTTIG-GUARD stainless steel nails. Backed by a limited lifetime fastener warranty, HUTTIG-GUARD stainless steel nails are recommended for outdoor applications and with treated lumber, cedar, and redwood. Use HUTTIG-GUARD Grade 316 Stainless Steel nails in marine environments.

Drywall Nail

For attaching sheets of drywall to wood studs.

- Thin, broad head sits flush against surface
- Ring shank for greater holding power
- Long diamond point reduces tearing of drywall paper
- Conforms to ASTM C514

Available Finishes

Size	Shank Diameter	Head Diameter	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	50 lb. Box

1-5/8"	.099"	11/32"	Ring	295	HGN158BLRSDW1	HGN158BLRSDW5	—

Drywall Nail - Cupped Head

For attaching sheets of drywall to wood studs.

- Cupped head sinks into surface, accepts joint compound
- Slightly heavier shank than standard drywall nails
- Smooth shank and long diamond point reduces tearing of drywall paper
- Phosphate coating reduces friction, binds with joint compounds and paint
- Conforms to ASTM C514

Available Finish

Lath Nail

For attaching wood lath strips to wood studs.

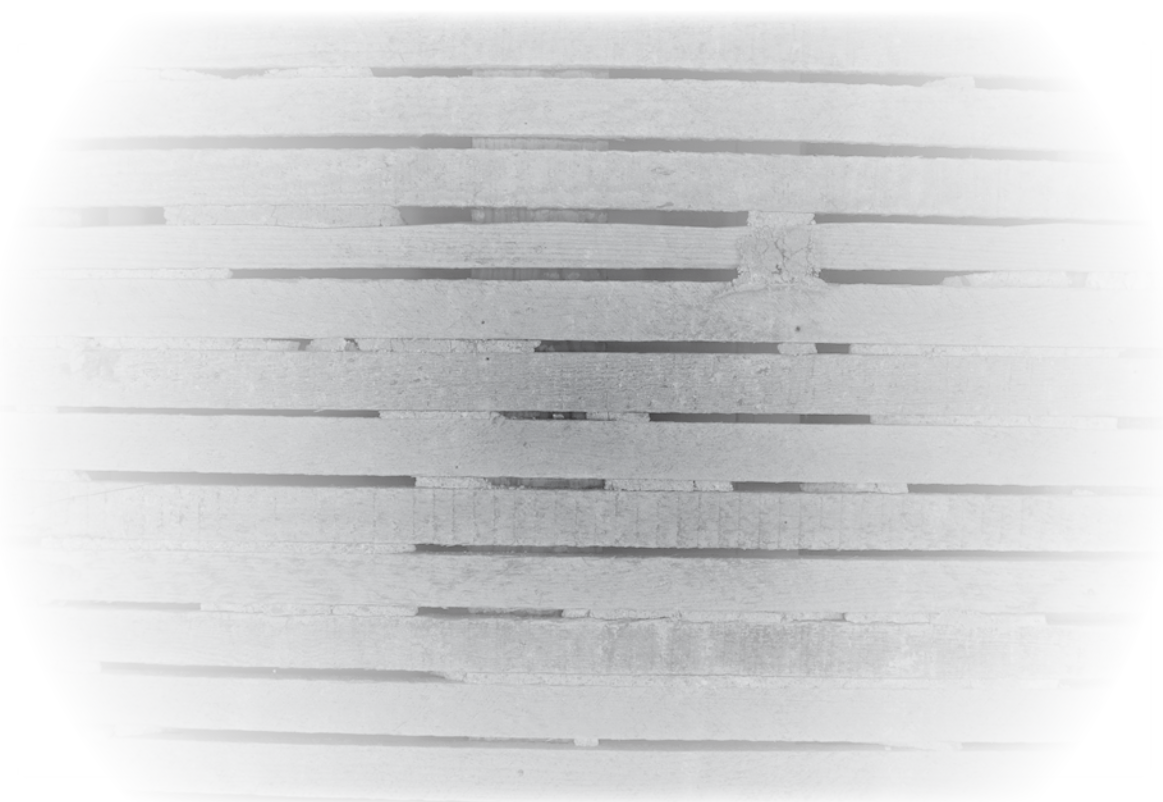

- Smooth, slender nail to minimize splitting narrow strips of lath
- Heat sterilization process creates blue oxide film, more resistant to corrosion from wet plaster
- Smooth, flat head
- Diamond point

Available Finish

Size	Shank	Approx. count / lb.	5 lb. Box 5 / master	50 lb. Box

DRYWALL & STEEL FRAMING SCREWS

COLLATED FASTENERS

Finish Nail

For attaching trim and moulding.

- Thin shank to minimize splitting narrow pieces of wood, hole easier to conceal
- Cupped head for ease of concealment
- Diamond point

Available Finishes

CONSTRUCTION FASTENERS

WOOD & EXTERIOR SCREWS

DRYWALL & STEEL FRAMING SCREWS

COLLATED FASTENERS

Casing Nail

For attaching trim, window, and door casing.

- Similar to finish nails but with slightly larger head and heavier gauge for window frames and door jambs
- Deep countersunk head sinks into wood, aids with concealment
- Diamond point
- Conforms to ASTM F1667-17

Available Finishes

Duplex Nail

For concrete forms, scaffolding, and other temporary applications.

- Also known as scaffold nail
- Double head and smooth, uncoated shank allow for ease of removal
- Diamond point
- Conforms to ASTM F1667-17

Available Finish

Size*	Shank Diameter	Head Separation	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	30 lb. Bucket	50 lb. Box

* Length of the nail is measured from beneath the lower head to tip of nail

Box Nail

For light-duty general construction, carpentry, and box making.

- Relatively thinner shank and sharp point minimize splitting in wood
- Smaller shank and head than common nails of the same length
- Flat head sits flush against surface
- Diamond point
- Conforms to ASTM F1667-17

Available Finishes

Cut Masonry Nail

For attaching furring strips and other materials to cinder block, mortar joints, fresh concrete and brick walls.

- Tempered hardened steel for harder, less brittle nail
- Blunt point and tapered shank minimize splitting in wood
- Flat, rectangular head

Available Finish

Size	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	50 lb. Box
TEMPERED HARDENED STEEL - BRIGHT				
1-1/2"	4d	125	HGN4CUTM1	HGN4CUTM5

3-1/2"	16d	26	HGN16CUTM1	HGN16CUTM5

Fluted Masonry Nail

For attaching wood furring strips, studs, or floor plates to fresh concrete.

- Tempered hardened steel for harder, less brittle nail
- Flutes help to minimize cracking and allow debris to surface
- Flat head sits flush against surface
- Diamond point

Available Finish

Size	Shank Diameter	Head Diameter	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	50 lb. Box

Masonry Stub Nail

For applications where a smooth masonry style nail is required.

- Tempered hardened steel for harder, less brittle nail
- Larger head compared to standard masonry nails
- Smooth shank
- Diamond point

Available Finish

Size	Gauge	Head Diameter	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	50 lb. Box

DRYWALL & STEEL FRAMING SCREWS

COLLATED FASTENERS

Copper Roofing Nail

For installation of slate, tile and copper roofing.

- Also known as copper slating nails
- Shank diameter fits pre-formed tile and slate holes
- Larger head covers tile holes
- Top quality CDA-110 copper
- Conforms to ASTM B49

Size	Gauge	Head Diameter	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master

Stainless Steel Box Nail

For light-duty general construction, carpentry, and box making.

- Relatively thinner shank and sharp point minimize splitting in wood
- Smaller shank and head than common nails of the same length
- Flat head seats flush against surface
- Diamond point

Size	Gauge	Shank Diameter	Head Diameter	Shank	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master

Lifetime Limited Fastener Warranty. See www.huttig.com/warranty for complete details.

Stainless Steel Trim Nail

For attaching soffit, fascia, and other cedar, aluminum, vinyl, or composite exterior trim.

- Thin shank to minimize splitting narrow pieces of wood, hole easier to conceal
- Smaller, smooth head for inconspicuous finish
- Available painted with premium baked enamel paints

HUTTIG-GRIP & HUTTIG-GUARD WOOD SCREWS

Huttig delivers the most complete mix of wood screws designed specifically for interior or outdoor applications.

All Huttig wood screws are designed to provide superior penetration, grip and strength—all while reducing effort, head-pops, breaks and splitting.

FLAT HEAD WITH NIBS

DOUBLE COUNTERSINK FLAT HEAD WITH NIBS

HEAD

Huttig-Grip All Purpose and Huttig-Guard outdoor screws have flat heads with nibs, while others use bugle heads.

- Flat head -
 - designed for use with wood; bugle head is best for drywall applications, tucks drywall paper under the head
 - dramatically reduces head pops when driving fasteners into wood; bugle head intended to sink into softer materials, prone to breaking especially when used with harder woods
- Nibs help to “seat” the head into wood for flat, smooth installation surface
- **HUTTIG-GUARD Platinum Outdoor Screws feature a Double Countersink Flat head with Nibs** for ultimate seating in wood

STAR DRIVE

DRIVE

Huttig-Grip All Purpose and Huttig-Guard screws have a star drive versus Phillips.

- Star drive is a “positive” drive; keeps driving tool in place, even with high torque
- 12-point contact with bit
- Eliminates head spin outs
- FREE star drive bit with all Huttig-Guard screws 

COARSE SERRATED THREAD

THREAD

Huttig-Grip All Purpose and Huttig-Guard wood screws have coarse, serrated thread.*

- Serrated threads reduce the torque needed to drive the screw without reducing holding power

*Huttig-Guard Stainless Steel screws are coarse thread.

KNURLED SHANK

KNURLED SHANK

- **HUTTIG-GUARD Platinum Outdoor Screws feature a knurled shank;** reams hole in board reducing drag on shank & driving tool for faster, easier penetration

TYPE 17 POINT

POINT

Huttig-Grip All Purpose and Huttig-Guard screws have a Type 17 point versus standard sharp point.

- Type 17 point was originally designed for the hardwood wood-working industry
- “Drills” through wood; penetrates some of the hardest woods faster, eliminates splitting at board ends
- Quickly starts wood penetration without “walking”, also cuts wood fibers when driving for faster initial installation times

HUTTIG-GUARD Platinum Screws feature a Type 17 Long point for even faster, easier penetration

- Designed for use with thicker pieces of hardwood where more material will be displaced, fluting helps to move chips out of the hole

TYPE 17 LONG POINT

GAUGE

Huttig-Grip all purpose and Huttig-Guard wood screws are made of heavy gauge wire.

- Superior holding power
- Eliminates head pops and screws breaking during drilling

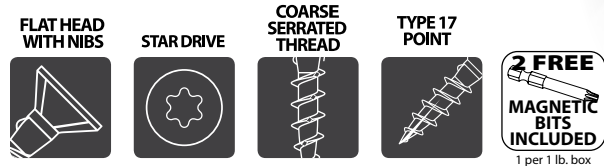

Application & Finish

APPLICATION	FINISH RECOMMENDATIONS			
General Construction	 YZ YELLOW ZINC	Yellow zinc coating applied to fastener; smooth, shiny finish.	Zinc plating provides minimal protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.

All Purpose Screw

For all wood-to-wood applications.

- 12-point star drive for better engagement, more torque
- Flat head with nibs for fewer head pops, smoother finish
- Coarse, serrated thread cuts through wood using less torque
- Type 17 point drills own hole, easier to drive into hardwoods

Professional Outdoor Screw

For deck, patio, and outdoor construction.

- 12-point star drive for better engagement, more torque
- Flat head with nibs for fewer head pops, smoother finish
- Coarse, serrated thread cuts through wood using less torque
- Type 17 point drills own hole, easier to drive into hardwoods
- 15 Year Limited Fastener Warranty. See www.huttig.com/warranty for complete details

Premium Composite Deck Screw

For attaching composite decking to deck frame.

- 12-point star drive for better engagement, more torque
- Mushroom head not much larger than shank, designed to sink to the hole, trapping material beneath, eliminating head pop-ups on deck surface
- Triple-thread design traps material within the hole, away from surface
- Type 17 point designed for use with dense, harder materials, eliminates splitting at end of boards
- 50 Year Limited Fastener Warranty. See www.huttig.com/warranty for complete details

INSTALLATION TIP

- 350 piece installs 100 ft.²
- 1,750 piece installs 500 ft.²

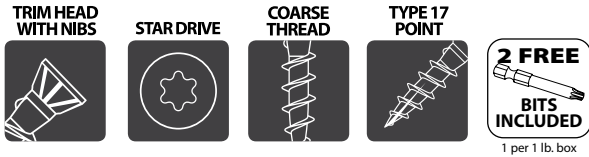

50 Year Limited Fastener Warranty. See www.huttig.com/warranty for complete details.

Stainless Steel Trim Screw

For attaching deck boards, railings, and trim.

- 12-point star drive for better engagement, more torque
- Trim head for concealment
- Coarse thread cuts through wood
- Type 17 point drills own hole, easier to drive into hardwoods
- Lifetime Limited Fastener Warranty. See www.huttig.com/warranty for complete details

Lifetime Limited Fastener Warranty. See www.huttig.com/warranty for complete details.

Platinum Trim Screw

For attaching deck boards, railings, and trim.

- 12-point star drive for better engagement, more torque
- Trim head for concealment
- Coarse, serrated thread uses less torque to cut through wood
- Knurled shank for reduced drag, faster, easier penetration
- Type 17 long point designed for use with thicker pieces of hardwood
- Lifetime Limited Fastener Warranty. See www.huttig.com/warranty for complete details

 ADVERTENCIA: Cáncer y Daño Reproductivo - www.P65Warnings.ca.gov

HUTTIG-GRIP™ & HUTTIG-SPIN™ DRYWALL & STEEL FRAMING SCREW ATTRIBUTES

DRIVE

PHILLIPS DRIVE

Cross-shaped recess designed to cam-out (bit slips out of the drive) before being overdriven, preventing screws breaking from too much torque.

SQUARE DRIVE

Bit fits into screw head, less likely to slip out. Screw stays on the bit, easier for one-handed fastening.

STAR DRIVE

"Positive" drive; keeps driving tool in place, even with high torque. Eliminates head spinouts.

HEAD

BUGLE HEAD

Used with drywall and softer woods where head can sink just below surface, holding material beneath. Rounded edges, sloping neck prevent tearing of material.

FLAT HEAD WITH NIBS

Used with wood, cement board, and other similar materials. Flat head sits flush. Nibs help to "seat" the head for smoother finished surface.

MODIFIED TRUSS / WASHER HEAD

Larger head diameter for holding material in place, low profile for applications with minimal clearance and/or minimized appearance.

PAN HEAD

For high-torque installations into wood or metal. Lower profile than oval or round screws, with a flat or slightly rounded top and vertical edges.

TRIM HEAD

Trim head for concealment.

WAFER HEAD

Used with wood, cement board, and other similar materials. Flat, wider head sits flush while providing expanded bearing surface.

WAFER HEAD WITH NIBS

Used with wood, cement board, and other similar materials. Flat, wider head sits flush while providing expanded bearing surface. Nibs help to "seat" the head for smoother finish.

HEX WASHER HEAD

Hex head is preferred for high-volume projects; relatively easy to engage, tighten, and loosen, supports more tightening torque than other head styles. Metal flange at base of head provides pull-through resistance.

SLOTTED HEX WASHER HEAD

Benefits of hex washer head, plus can also be driven with a standard/flat-blade screwdriver or bit.

HEX HEAD WITH NEOPRENE WASHER

Benefits of hex head, plus neoprene-bonded washer provides seal against moisture.

THREAD

FINE THREAD

Used with attaching to steel and other metals and thin pieces of wood. Threads are finer, closer together, more precise; necessary when working with thinner and/or more brittle materials. Greater holding power compared to coarse thread.

COARSE THREAD

Used with wood, cement board, and other similar materials. Coarse thread accepts more material between threads and is forgiving; more likely to drill and hold even if slightly dinged or otherwise blemished.

HIGH-LOW THREAD

Used with low-density materials such as cement board. Thread design reduces the amount of required torque, reduces cracking, and has greater pull-out resistance.

POINT

SELF DRILL POINT

Used when fastening to steel, other types of metal, and thin pieces of wood. Drills own pilot point into medium to heavy steel.

SHARP POINT

Used when fastening to wood and other medium to soft materials. May require drilling of pilot point.

TYPE 17 POINT

Used when fastening to wood, especially denser, harder woods. Flute in point helps to draw material out of the hole.

SPADE POINT

Used to quickly bore holes through wood and similar materials.

HUTTIG-GRIP™ & HUTTIG-SPIN™ APPLICATION & FINISHES

APPLICATION	AVAILABLE FINISHES			
For attaching drywall to wood				
For attaching drywall and other materials to light-gauge steel				
For attaching drywall and other materials to heavy-gauge steel				
For attaching to wood				
For attaching cement and fiber cement board				

FINISH RECOMMENDATIONS			
	Plain, "bright" steel without any additional protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.	
  	Iron phosphate coating created on the surface of the fastener to enhance adhesion of paint and other finishes (drywall compound).	Phosphate coating provides minimal protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.
 	Clear or yellow zinc coating applied to fastener; smooth, shiny finish.	Zinc plating provides minimal protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.
	Limited 50 year fastener warranty.	Recommended for outdoor applications and with treated lumber.

HUTTIG-SPIN™ - Designed for the Pro Contractor

- **Sourcing:**
 - Produced only in approved mills in Taiwan
 - All packaging has mill and production codes for traceability
- **Testing:** Completed on all products
 - Drywall screws – sharp point coarse & fine thread
 - Drywall screws – self-drill bugle head
 - Modified truss – sharp point & self-drill
 - Pan framers – sharp point & self-drill
 - Hex washer head screws – sharp point & self-drill
 - Cement board screws – spade point & self-drill
- **Testing protocol:** Detailed process, includes sampling during production & pre-shipment full inspection report on every batch
- **Product specifications:** Developed to meet or exceed industry expectations, based upon extensive testing of competitive brands including Grabber, Pro-Twist, Hilti and ITW Buildex
- **ASTM:** All screws are made from C1022 wire
- **Product identifier:** “HS” head stamp for easy identification & inspection

Pan Framer

For attaching light-gauge steel track to light-gauge steel studs where high torque is required.

- Pan framer head allows relatively high torque with wide base to keep material in place
- Sharp point, fine thread for use with light gauge steel

Available Finish

PC
PHOSPHATE
COATED

Enlarged to show detail

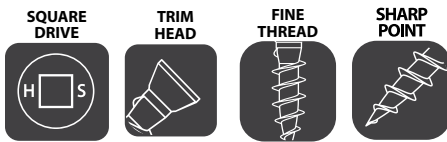

Length x Gauge	Drive	Point	Approx. count / lb.	1 lb. Box 12 / master	5 lb. Box 5 / master	Bulk Box	Box Quantity
PHOSPHATE COATED

Hex Washer Head Screw - Self-Drill

10 Gauge for attaching medium-gauge sheet metal such as HVAC to steel framing.
12 Gauge for attaching purlins and channels to structural studs.

- Hex head for high torque, flange at base prevents pull-through
- Self-drill point, fine thread for use with steel

Available Finish

FINISH RECOMMENDATIONS			
	Plain, "bright" steel without any additional protection against corrosion.	Not recommended for outdoor applications or where moisture may be present.	
  	Zinc plating bonded to steel with electrical charges; smooth, shiny finish.	Electro galvanization provides moderate protection against corrosion.	Recommended for outdoor applications excluding treated lumber.
 	Hot zinc applied to fastener for thicker, more durable coating; rougher, sometimes darker finish.	Hot galvanization provides significant protection against corrosion.	Recommended for outdoor applications and with treated lumber.
	Multi-step process; zinc applied to fastener followed by a variety of methods to harden the coating for additional protection.	Outdoor galvanization provides significant protection against corrosion, equal to or better than hot galvanization.	Recommended for outdoor applications and with treated lumber.
	Limited lifetime fastener warranty.	Recommended for outdoor applications and with treated lumber, cedar, and redwood.

Huttig Building Products Limited Warranty for Huttig-Guard Professional, Premium, Platinum, or Stainless Steel Fasteners

What Does This Warranty Cover?

This limited warranty applies to the first retail purchaser of Huttig-Guard Professional, Premium, Platinum, or Stainless Steel fasteners (also referred to herein as the “Fasteners”). Huttig Building Products warrants that such fasteners will be free from any defects in material and workmanship for the specified warranty period for the original project for which it was installed when used in accordance with the recommendations listed in the Huttig-Grip Fasteners Catalog or elsewhere by Huttig Building Products. Please note that all metal fasteners have the potential to corrode. There are no warranties (including any of warranty of merchantability) that extend beyond the foregoing and such warranty applies to Huttig-Guard Professional, Premium, Platinum, or Stainless Steel fasteners only.

Product	Warranty Period
Professional	15 Years
Premium	50 Years
Platinum	Lifetime
Stainless Steel	Lifetime

Who Is Entitled to the Warranty and How Long Does The Coverage Last?

This warranty is granted to the first retail purchaser only, is not transferable and lasts for the product specified warranty period for the project for which it was originally installed.

What Will Huttig Building Products Do?

Huttig Building Products will replace the defective Huttig-Guard Professional, Premium, Platinum, or Stainless Steel fasteners with like or equivalent product. Any labor for installation, removal or other material charges are not covered by this limited warranty.

What Does This Warranty Not Cover?

This warranty does not cover issues caused by:

- Any defect due to environmental conditions or inadequate or improper handling, transportation, storage or maintenance,
- Failure or damage caused by improper installation (including chipped coating during installation), application, improper preparation, the building site, any 3rd party products, inadequate structure design, reuse or reinstallation of the fastener,
- Failure or damage caused by wood destroying insects, animals, wood fungus, mold, mildew, exposure to chemicals or other hazardous substances, a corrosive environment or materials, standing water, or premature deterioration of building materials,
- Failure or damage used in a structure that does not comply with all local, state and federal building codes, laws, rules and regulations,
- Use of fasteners in extreme temperatures or extreme environmental conditions,
- Fasteners subjected to negligence, excessive or improper use, willful misconduct, actions or inactions by the installer (general contractors, owners, third party builders),
- Wear or damage due to traffic involving motorized vehicles.

Huttig Building Products’ liability is limited to the replacement of the defective product only except in the event replacement of the product is not available, then a refund of the purchase price of the defective product.

How Do You File A Claim?

If the performance of Huttig-Guard fasteners does not meet the stated limited warranty, the original purchaser must contact Huttig Building Products to initiate a claim. Please use the Defective Product Warranty Claim Form found at <https://huttig.com/warranty>.

Information required for claim:

Customer Information:

First Name, Last Name
Street Address, City, State, Zip
E-mail address
Telephone number

Product Information & Claim Details:

Purchase Date
Purchase Receipt
Product Name, including Color
Quantity Purchased
Quantity Defective
Date Installed
Where Installed (back yard, pool area, et cetera)
Application (fence, deck, et cetera)

Include photos of structure and defective product along with original box and receipt.

Initiate claim by email at warranty@huttig.com or by mail:
